- English
- Hindi
- Marathi

---

## SKILLS

- Front-end development
- Html, CSS, JavaScript, Bootstrap
- Python
- Basics of Java, C and SQL

---

## KEY PROJECTS EXECUTED

### **Title: YouTube Transcript Summarizer Project**

**Tools:** Front-end using HTML and CSS.

**Overview:** It is a Google Chrome extension that provides a summary of any YouTube video containing transcript regardless of how long the video is, it will summarize the whole video in a small summary of about 200 words.

### **Title: Vehicle Overspeed Detection System**

**Tools:** Python, IOT

**Overview:** It was an IOT-based project aimed at detecting the speed of vehicles and showing it on the LCD display. If the vehicle crosses the speed limit it would trigger the buzzer and show overspeed on the display. We also integrated the Thingspeak cloud platform for real-time data monitoring from our mobile devices.

### **Title: Automobile Dealership Website**

**Tools:** HTML, CSS, JavaScript

**Overview:** Automobile dealership website using HTML and CSS, a Visually appealing and user-friendly interface which showcased vehicle listings, details, and images with Easy-to-use menus and search functionality and optimized for desktop, tablet, and mobile devices

### **Title: Netflix Clone**

**Tools:** HTML, CSS, JavaScript

**Overview:** Iconic Netflix aesthetics with a polished, modern user interface using HTML, CSS Dynamic, JavaScript-powered features showcasing trending shows and personalized recommendations and seamlessly adapts to desktop, tablet, and mobile for optimal viewing

---
